Ferguson Park Interior Road Repairs

This week Parks and Streets staff began drainage and roadway construction at Ferguson Park. Over the past few years, the interior road section near the food bank in Ferguson Park has deteriorated due to a combination of the heavy garbage truck traffic and a drainage issue. The photo above shows staff digging up all the broken asphalt, reshaping the area and digging a trench so the excess water will be channeled to the previously prepared drainage area next to the blue dumpster shown in the photo.

The 10x100 asphalt road work will be completed within the next few weeks. This is one of the many small deferred maintenance projects within the parks system that was put on hold due to the recession and budget cuts. The City is pleased to be completing some of these deferred maintenance projects in the upcoming months and years.
