Welcome to the inaugural issue of the City of Snohomish quarterly magazine!

Over one year ago, the City Council appointed a number of volunteer citizens to participate in an open government committee, and one of their final recommendations was a citywide quarterly magazine. The purpose is to better engage and inform you regarding your City services. By working with our local businesses and Philips Publishing, we are able to pay for the cost of production through advertising over time. So please support your local businesses and keep your tax dollars in town. I look forward to hearing from you on suggestions for future issues.

City Council Highlights

October 2016

(October 4 workshop and regular meetings were canceled.)

October 18—Workshop Meeting:

- Discussed 2017 budget recommendations. During a two-hour workshop, the Council discussed the budget overview and City departmental budget requests. Council directed staff to add \$19,250 to the budget for a contribution to support services by the Snohomish Health District

October 18—Regular Meeting:

- Held a public hearing for 2017 budget revenue sources. No action taken and no changes directed.
- Held a public hearing for water, sewer and stormwater rates. Council voted 7-0 to adopt rates in Resolution 1348.
- Authorized contract with Philips Publishing for a quarterly City magazine. Council voted 7-0 to approve annual costs not to exceed \$13,500 for 2017.
- Authorized contract to participate in a small cell technologies regional legal consortium. The group of cities and attorneys representing cities in King and Snohomish counties is working to control and limit impacts of cell phone providers transitioning to 5G technologies for cell phone transmission equipment in communities.
- Discussed a proposed contract to renew garbage collection services with Allied Waste. Rates and services for garbage, recycling and yard waste services were reviewed; no action taken.

November 2016

November 1—Regular Meeting:

- Held the first of two public hearings for the 2017 property tax levy. No action taken; the hearing was continued to November 15.
- Held a public hearing regarding the request for a right of way vacation at Tenth Street. Council approved the request on a 7-0 vote.
- Held a public hearing regarding the low impact development code update. Council adopted the proposed City code amendments on a 7-0 vote.
- Authorized a temporary use permit with the Washington Department of Fish and Wildlife (WDFW). Council approved the permit on a 7-0 vote to authorize the WDFW to review debris during flood events, and Council also approved recommendations that no user fees be required for use of the boat launch.
- Authorized a contract with BHC Consultants for an update of the City's Sewer Plan. Council approved expenses not to exceed \$219,368 on a 7-0 vote.
- Discussed an overview of City water, sewer and stormwater utilities. Council accepted the report and directed no changes.
- Discussed development code changes for the Pilchuck District to allow light industrial uses in specific zones within the District. Council directed no changes to staff recommendations and asked that graphical examples of proposed uses and design elements be provided when staff returns with specific proposed code changes.
- Discussed changes to the City's construction noise ordinance. Council discussion generally supported future code changes that would require such construction noise to end at 9:00 p.m. instead of 10:00 p.m.

November 15—Regular Meeting:

- Held a public hearing for the 2016 amendment to the City's Comprehensive Plan. Council approved on a 7-0 vote Ordinance 2317 to amend the City's land use map in order to change the use designation at 2501 Bickford Avenue from Business Park to High Density Residential.
- Held the second of two public hearings for the 2017 property tax levy. Council approved on a 7-0 vote a 1% increase in the 2017 levy.
- Held the first of two public hearings for the 2017 budget. Council directed no changes and continued the hearing to December 5.
- Authorized the Mayor to sign a letter supporting the property owner of the Seattle-Snohomish Mill's request for a change to Snohomish County zoning limitations in the City's Southern Urban Growth Area. Council approved the letter on a 7-0 vote. The zoning change could permit underlying Light Industrial zone uses on the site of the former lumber mill.
- Discussed implementation of the City's Open Government Committee (OGC) initiatives. Council directed that staff develop

for future Council approval a proposed Resource Board for ongoing review of implementation issues and include at least one member of the OGC along with representatives of the City's standing boards and commissions and at least one City Councilmember liaison.

- Discussed staff planning for the City Quarterly Magazine. Council directed no changes to current planning for the publication.

December 2016

December 5—Regular Meeting:

- Adopted the 2017 Budget after holding the second of two public hearings. Council approved on a 7-0 vote the 2017 Budget; with overall revenues projected at \$28,153,060 plus beginning fund balance of \$19,148,657, for total 2017 budget sources of \$47,301,717.
- Adopted revised building codes. Council reviewed and adopted the recent changes in the State Building Code on a 7-0 vote.
- Adopted the final 2016 year budget amendments. Council adopted

on a 7-0 vote amendments to increase the General Fund budgeted expenditures by \$80,000 and the Stormwater Fund budgeted expenditures by \$40,000.

- Approved the 2017-2021 Interlocal Agreement for law enforcement services with the Snohomish County Sheriff's Office (SCSO). Council approved the new agreement on a 7-0 vote.
- Passed Resolution 1354 to set water, wastewater and stormwater rates for 2017 through 2019. Council approved the new utility rates on a 7-0 vote. (see
- Discussed but postponed action to December 13 regarding three actions implementing the voters' approval of Proposition 2 for the change in form of city government:
 - Special election dates to elect a mayor
 - Setting a salary for the new position of mayor
 - Establishing the position of city administrator

December 13—Regular Meeting:

- Passed Resolution 1355 to establish special election dates of August 1, 2017, and November 7, 2017, for election of mayor. Council passed the election resolution on a 5-1 vote.
- Established the optional position of city administrator by adoption of Ordinance 2323. Council adopted the ordinance on a 5-1 vote.
- Tabled further review until the January 3 meeting the proposed Ordinance 2324 to set salary for the new position of mayor. Council voted 6-0 to table the measure until January 3, 2017. **S**

Wastewater Utility Update—Rate Reduction in 2017!

THIS FALL, THE CITY COUNCIL approved an average wastewater rate reduction of 10%, effective January 1, 2017. Low water users will see their rates drop even more, by as much as 12.7%. The City of Snohomish’s average wastewater rates are less than the City of Monroe’s and starting in January 2017 our average rates are now also less than Lake Stevens Sewer District’s!

Wastewater is one of the most expensive services provided by the City. About one out of every four dollars of the City’s operating expenses is for the wastewater utility. Over the next 10 years, the City is planning to invest approximately \$16 million in capital improvements to the wastewater system. The City must persistently plan and implement upgrades to its treatment plant in order to meet today’s strict federal and state regulatory standards for effluent discharge into the Snohomish River and eventually the Puget Sound.

Based on our progress in recent years, the

City Council was able to cancel a proposed 90% increase in wastewater rates that would have been required in order to send our wastewater to the City of Everett for

of Compliance” in 2015. The dramatic turnaround in treatment resulted from the installation of innovative fixed film technology (or “Bacteria Hotels”) in 2012, never before used in Washington State.

This has allowed the City to continue treating its wastewater at the current plant, and the City is no longer required to send its wastewater to Everett. Upon that successful advancement, the Council was able to adopt a 0% (zero) increase in wastewater rates for 2014, 2015 and again in 2016; allowing no change in the rate for 3 years. Following the reduction in rates in 2017, the planned rate change for both 2018 and 2019 is 0% (zero), if no additional regulatory standards impact the

treatment plant.

FOR FURTHER INFORMATION: Steve Schuller, Deputy City Manager/Public Works Director at 360-282-3194 or schuller@snohomishwa.gov. **S**

2017 Bi-monthly Wastewater Rate	
<i>Average Family Use (1,200 cubic feet)</i>	<i>Low Use (400 cubic feet = 3000 gallons)</i>

Lake Stevens: \$170	Lake Stevens: \$170
Monroe: \$189	Monroe: \$189

treatment. In early 2014, the Washington State Department of Ecology Agreed Order requiring the City to send its waste to Everett was amended. The City met all the stringent conditions and received a “Notice

Future Closure of the City’s Water Supply & Treatment Conditioned on Preserving the City’s Water Rights

IN 2016, THE CITY COUNCIL PASSED RESOLUTION 1347 to close its Water Treatment Plant and remove its water supply diversion dam. This action is conditioned on several outcomes including preservation of water rights in the Pilchuck River system. The City’s water supply has been an ongoing focus of consideration since 2009.

A water rate study analyzed the costs of the two main scenarios: In Scenario 1, the City continues to maintain two sources of supply, both its City water treatment plant and supply from the City of Everett; and in Scenario 2, the City is served by one source of supply from Everett, and establishes an alternative source of supply for transmission line customers who are outside the City limits and water service area.

Which scenario is the preferred option (that is, the least cost) for City rate payers, both in the short term (2017 to 2019) and in the long-term (2017 to 2031)? Scenario 2, in which the City customers are served by one source of supply from the City of Everett, has significantly lower water rate projections for both the short and long-term. The difference in projected rates between the two scenarios is almost double (\$109.49/month vs. \$57.24/month) by 2031.

If we shut down our plant and discontinue our diversion of water from the Pilchuck River, how do we protect our water right for the future? A water right “trust” agreement is the preferred option. The Water Treatment Plant will not be decommissioned until a number of items are completed to the satisfaction of the City Council, including the water right trust agreement. The objective will be to shut down operations at the plant and discontinue the withdrawal of water from the Pilchuck River in about 12 to 30 months.

In October 2016, the Council approved a rate resolution implementing the Scenario 2 (All Everett) in which rates increase 2.25% each year over the next three years (2017, 2018 and 2019). This is the lower rate increase of the two scenarios. Although these rates have been studied for years at public meetings, the City wants to continue to hear from you. Please contact Steve Schuller, Deputy City Manager/Public Works Director at (360) 282-3194 or schuller@snohomishwa.gov. **S**

Change in Our Form of City Government

By Lynn Schilaty,
Council Position 1

FOR MANY OF US the 2016 election season yielded some unexpected results. Locally, this included the outcome of the voters approving Proposition 2, which authorizes a change in form of city government from Council-Manager to Mayor-Council.

What this change means is that instead of the seven-member City Council selecting one of its own to serve as Mayor for a two-year period, the voters, in 2017, elect a Mayor who will not be a member of the City Council and will have the authority to administer the government with much the

same powers as a City Manager has held within our local government for the past 45 years.

The fact that Proposition 2 was approved by a slim margin of just 11 votes indicates how evenly divided our community was about changing our form of government. Regardless of the vote count, however, the important focus for our City now

The important focus for our City now is to move forward in ways that will continue to ensure our community's success.

is to move forward in ways that will continue to ensure our community's success.

The City Council has authorized the Snohomish County Auditor's Office to set the initial election for Mayor on August 1, 2017, and to hold a runoff election for Mayor on November 7, 2017. Once that November 7 vote is certified by the County, the Mayor will take the oath of office and be empowered immediately as the new chief administrator of the City of Snohomish.

In my view, one key to our future as a community is how effectively we bridge the differences between citizens who opposed and

supported this change in government. As we move forward, I want to engage all citizens in the tasks of developing our city government's priorities, programs and projects. The Council remains the body that will establish these objectives.

And, because I am currently having some difficulty understanding the community vision of those who wanted to change our form of government, I see it as imperative that we bring

all segments of the community to the table. So, I'm asking for your participation, voice and/or service. We need you to get involved in order to understand how we can best move ahead with clear intentions and expectations that are broadly supported.

I hope each of you will join me by participating in one of the many ways listed below. Only then, I believe, can we ensure our collective success! **S**

Ways to Get Involved

- Email or call your councilmembers with concerns, questions or ideas. Council contact info found on City website.
- Attend City Council meeting on the 1st & 3rd Tuesdays of each month.
- Attend and/or apply for a City Board or Commission.
- Run for a City Council position. There will be five seats up for election this year. You would have to file in May for the November 7, general election. Must be a City resident for at least one year to qualify.
- Run for the Mayor of the City of Snohomish. Must be a city resident for at least one year to qualify. If you feel you have the leadership skills and experience to run the day to day operations of the city, the position of Mayor may be for you. Filing for the position will be sometime in June.
- Volunteer with any service organization in town.

More detailed information can be found on the City website: www.snohomishwa.gov or call City Hall 360-568-3115

Associate Planner Brooke Eidem

BROOKE EIDEM SAID IT WAS A “BATTLEFIELD PROMOTION” that resulted in her becoming an Associate Planner for the City. When a newly-hired Senior Planner abruptly quit after just six months she was asked to fill the breach in the City’s Planning & Development Services Department (PDS). That promotion followed a pattern she had already established during her eight-plus years working at the City. She started in March 2008 as a Permit Assistant in PDS. Six months later she was promoted to Permit Coordinator. In 2012 she became the City’s Permit Coordinator/GIS (Geographic Information Systems) Technician because the City had gone so long without a GIS Tech. When that Senior Planner quit in 2014, Brooke was well-acquainted with stepping up to fill a need.

Brooke Eidem

Brooke is married to C.K., a biologist for Ducks Unlimited. They are the proud parents of two boys ages 3 and 5.

As an Associate Planner, Brooke reviews land use and building permit applications. She also does the initial environmental review of proposed projects. Frequently, she’s out in the field inspecting new projects and investigating complaints about land use violations. She interacts with the public daily at the front counter, in pre-application meetings, and out in the field.

Brooke staffs the City’s Design Review Board where her graphic design skills come in handy. Currently she is helping the Board finish up an update to the City’s Historic

District Design Guidelines.

Away from work Brooke and her family frequently go camping. When she has some free time, she especially enjoys making jewelry, painting, sewing, knitting, embroidering, and baking.

She thinks Snohomish is a special small town with its beautiful old buildings and ample park space. “It’s very eclectic with a bit of everything

and because it’s a small town it’s easy to enjoy that variety,” Brooke said. “Snohomish has old roots with modern amenities.”

“I do love my job. I like the variety of projects I get to work on,” she said. “I get to talk to lots of different people and the staff is awesome to work with. We all work well together to solve problems.” **S**

The Snohomish Boys & Girls Club

Your local city government is tasked with providing specific services, such as wastewater treatment or law enforcement. But a great community needs other services too. Many community, business, educational and other organizations help make Snohomish a wonderful place!

In this issue, we spotlight the Snohomish Boys & Girls Club. The City of Snohomish partnered with the Snohomish Club over 14 years ago. The City provided the land and a long-term lease for the building located at 402 Second Street. The non-profit Boys & Girls Club of Snohomish County manage and finance the operations and programs.

THE SNOHOMISH BOYS & GIRLS CLUB OPENED ITS DOORS in September of 2003. Over the past 13 years, the Club has continued to thrive and grow in the community. With over 1500 members and an average daily

attendance of nearly 350 youth, the Club is a very busy place!

Activities at the Snohomish Boys & Girls Club include licensed before and after school care, summer camp programs, youth athletic leagues, teen programs, and other seasonal programs such as Lego Robotics and summer specialty camps. In addition to the daily activities at the Club, before and after school child care programs are also held onsite at Cascade View Elementary, Cathcart Elementary, and Machias Elementary.

Boys & Girls Clubs athletic programs are a great way to introduce youth to team sports.

Flag football and volleyball are offered in both the spring and the fall. Soccer is also available in the fall. Basketball is offered during the winter. Volunteer coaches and team sponsors are always needed and much appreciated.

Being a part of the Snohomish Community is something that is very important to the staff at the Boys & Girls Club. Staff members serve in many community capacities including being involved in the Chamber of Commerce, Snohomish Kiwanis, and Klā Ha Ya Days. If there is an event in town, you can be sure that the Club will be there!

The Snohomish Boys & Girls Club attributes much of its success to strong partnerships with the Snohomish School District, City of Snohomish, the business community, and many local individuals.

The Snohomish Boys & Girls Club attributes much of its success to strong partnerships with the Snohomish School District, City of Snohomish, the business community,

and many local individuals. Opportunities to be involved are many through contributions of time, talent, or treasure.

The Snohomish Boys & Girls Club is one of 22 clubs in the Boys & Girls Clubs of Snohomish County organization, which has been serving youth in Snohomish County since 1946. The mission of the Boys & Girls Club is “to enable all young people, especially those who need

Scarlet and Payton make new friends at the Boys & Girls Club!

us most, to reach their full potential as productive, caring, responsible citizens”. We do that by providing a safe place for kids ages 5-18 with supportive adult mentors and by providing quality programming in the areas of academic success, character and citizenship, and healthy lifestyles.

For more information, please visit the Snohomish Club page at www.bgsc.org or call 360-568-7760 to arrange a tour. **S**

Traffic Congestion

Each quarter, the INSIGHT section will tackle Complex Problems with Upfront Answers

TRAFFIC CONGESTION: IT IS INEVITABILITY INCREASING in every large growing metropolitan area around the world. The three current ways to meet this complex challenge are generally politically infeasible or economically impractical:

not solve road congestion. The majority in our area enjoy living in neighborhoods that are not dense enough to support full use transit. Because of “induced demand”, shifting a portion of drivers to transit only encourages other drivers to take up the added road capacity. Los Angeles opened a light rail line in 2012. A study in 2015 found that the project did a worthy goal, boosting transit ridership in a car-choked corridor, but it had done little to relieve traffic congestion.

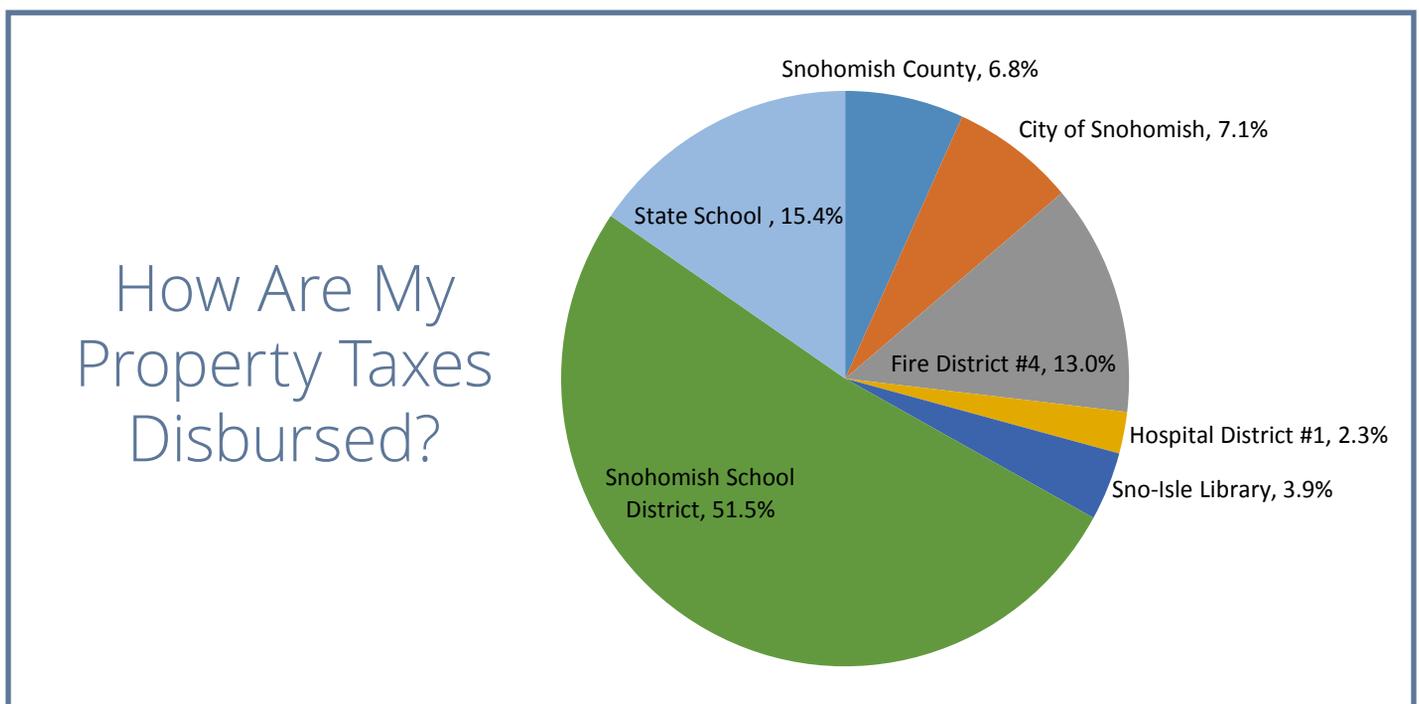

1) Congestion pricing. Congestion would drop if drivers had to pay to use major commuting roads during peak hours. But the pricing solution is often rejected because most of our roads have been “free” to use, and more affluent drivers could travel whenever they wanted, which many would resent. The new toll lanes on I-405 are a small test of congestion pricing, and a matter of much debate in our recent local election.

2) Build more roads. As a city’s economy grows, the metro area expands in size, increasing congestion. As more road capacity is added, it encourages even more homes and offices to be built and for the region to expand even farther out. At the same time, citizens begin to demand more protections on limited

open space and new restrictions on expanding neighborhood roads “just so commuters can cut through”. In the Houston area, they expanded portions of I-10 to 16 lanes (yes that is correct, sixteen or 8 in each direction). Three years following completion, the morning commute increased by 25 minutes (or 30 %) and the afternoon by 23 minutes (or 55 %).

3) Expand transit. Expanding transit in dedicated lanes or rails gives drivers an option to avoid heavily congested highways. It does

Our growing congestion is frustrating. Most want our area to be successful economically, but not the traffic consequences. Peak travel congestion is the balancing mechanism that makes it possible for us to pursue what we value, living in low-density settlements, and having many choices of locations to live and work. For the near future, we must learn to live with congestion. In a future issue of *Snohomish Quarterly* we will discuss the “driverless” or autonomous vehicle. Will this new tech transform our travel and our cities? **S**

Fraud Awareness for Older Adults

THE SNOHOMISH POLICE DEPARTMENT RECEIVES REPORTS ALMOST WEEKLY

from older adults about possible fraudulent activity. The activity is most often done over the phone with the caller claiming to be calling on behalf

By Chief John Flood

of another person, agency, or company. Most people recognize the calls to be suspicious and they take appropriate measures to protect themselves but these scam callers are getting more sophisticated and older adults are most often the intended victim.

Unfortunately, some people do fall victim to these scammers and unauthorized withdrawals from the victim's bank accounts or other serious events occur with almost no chance of ever recouping the loss. The Federal Trade Commission (FTC) and the Better Business Bureau (BBB) take steps to bring legal action against scammers but the list of new scams continues to grow almost daily and awareness is the first defense against victimization.

An FTC survey of consumer fraud in the U.S., published in February 2014, found that more than 2 million people were victims of one or more frauds. The BBB reports that for 2016 they have received 42,778 reports of scams nationwide. In the State of Washington, the BBB has received 2,076 reports of scams and in our Snohomish zip code, the BBB has received 48 reports of scams.

The specific types of fraud most frequently reported to the BBB by victims included online purchase, fake check or money order, debt collections, credit cards, fake invoice, employment, IRS tax collection, charity, sweepstakes or lottery prizes, computer spyware, and tech support.

The survey conducted by the FTC in 2014 found that consumers who were more willing to take risks and those who had experienced a serious negative life event in the past two years (events such as divorce, death of a family member or close friend, serious illness or injury in the family, or the loss of a job) were more likely to become victims. According to the FTC, fraudsters typically target consumers of all ages – but they know that older adults are likely to have bigger nest eggs, which makes

them more attractive.

Residents of the greater Snohomish area are encouraged to always be cautious of situations that sound or seem too good to be true. Older adults do not want to be labeled as vulnerable victims. Instead, they have a great deal of life experience that enables them to recognize and avoid scams. The BBB is a tremendous resource for those who have questions or who want

to report a scam. Anyone who is interested in knowing more can find the BBB online at <http://www.bbb.org/northwest>. Additionally, the FTC has helpful information regarding scams and they can be found online at <https://www.ftc.gov/>. It is everyone's responsibility to help others by reporting scams and scammers. If you spot a scam, report it to the BBB or the FTC. **S**

Small Cell Facilities

IN THE BEGINNING THERE WAS 1G (1st Generation). That was back in the cellular telephone Stone Age in the early 1980s. With 1G people could call other people directly using their mobile devices.

Text messages became possible with the introduction of 2G digital cellular service. With 3G's mobile broadband we could browse the internet on our cell phones. The introduction of 4G in 2009 enhanced all of the previous capabilities and dramatically increased the speed at which large data files could be transmitted.

Next up is 5G (5th Generation) expected to be deployed in 2020. 5G will use higher frequencies which exponentially increases the speed at which data can be transferred. It will allow continuous streaming of high-definition media on mobile devices and the "Internet of Things" –

Examples of a small cell facility co-located on an existing street light (left) and utility pole.

machine-to-machine communication – would become a reality.

However, because high frequencies don't

travel as far as lower frequencies, 5G will require new antennas to be built to fill the gaps between existing cell towers. These new 5G antennas will be "small cell" facilities, which by definition are no more than 3 cubic feet (a medium size suitcase). Typically they are attached to existing poles in the street such as street lights, traffic signals, and power poles. They can also be attached to buildings. Small cell facilities have a limited range of 1,500 feet (about two blocks) and cannot be shared by carriers so there will be a lot of them.

City staff is working proactively to have comprehensive regulations and other tools in place before the expected deluge of small cell facility applications begins in 2018. With good regulations we'll be able to enjoy the best telecommunications service available while still protecting the aesthetics of our community. **S**
