# LAND USE APPLICATION DESCRIPTION

## Air Gap Project

### Description of Request:

To permit a project for installing two air gaps to the water system at the City's wastewater treatment plant (WWTP) for the purposes of providing cross connection control (CCC). CCC at sewage facilities has two functions; to protect the public potable water system from contamination and to protect the onsite domestic potable water system from contamination.

The Facility designs will include a pressurized water system supplied through an air gap to facilitate cleaning or flushing of wet wells, dry wells, tanks, basins and equipment.

The project will include the following elements:

- Two air gap facilities at the WWTP, one near the headworks at the north end of the facility and one near the southeast corner of the facility.
- Two 500 gallon poly tanks for each air gap location including associated piping, valves and pumps.
- One 3-inch thick 10' x 20' concrete pad.
- One 12' wide x 20' long x 10' high building.
